6.2 Does the society have one or more subsidiaries?

(As defined in sections 100 and 101 of the Act)

- ☐ Yes
- ☒ No

All societies are registered meeting one of two conditions for registration. These are that the society is either:

- a bona fide co-operative society ('co-operative society'); or
- are conducting business for the benefit of the community ('community benefit society').

You must answer the questions set out in in the next section of this form, depending on which condition for registration you meet.

If you are not sure which condition for registration applies to the society please see chapters 4 and 5 of our guidance [here](#).

7.1 Condition for Registration

- ☐ Co-operative society
- ☒ Community Benefits society

Community benefit societies must answer the following questions in relation to the financial year covered by this return.

7B.1 What is the business of the society?

For example, did you provide social housing, run an amateur sports club etc.

Ovesco builds renewable energy projects in the form of photovoltaics on the roofs local businesses, schools and community buildings.

7B.2 Please describe the benefits to the community the society delivered?

Here we are looking to see what the benefits to the community were. Community can be said to be the community at large. For example, did you relieve poverty or homelessness through the provision of social housing.

We are able to reduce the electricity bills for the business or school that have solar panels. Additionally, the panels are used for education and information exchange with local communities, including pupils at the schools.

7B.3 Please describe how the society's business delivered these benefits?

The business of the society must be conducted for the benefit of the community. Please describe how the society's business (as described in answer to question 7B.1) provided benefit to the community.

Electricity monitors are provided in schools so pupils can access information about electricity generation. Directors and volunteers at the CBS give talks about renewable energy generation and the impact on CO2 emissions. The directors also attend STEM events in the area.

7B.4 Did the society work with a specific community, and if so, please describe it here?

For instance, were the society's activities confined to a specific location; or to a specific group of people? Please note that in serving the needs of any defined community, the society should not inhibit the benefit to the community at large.

The CBS focuses on business and schools in the Lewes District.

7B.5 What did the society do with any surplus or profit?

For instance, did you pay a dividend to members (and if so, on what basis); did money get reinvested in the business; put into reserves; used for some other purpose?

Excess profits are used to fund activities above.

7B.6 Please state any significant commercial arrangements that the society has, or had, with any other organisation that could create, or be perceived as creating, a conflict of interest.

Please tell us how you ensured that any such conflict of interest did not prevent the society from acting for the benefit of the community.

There are no arrangements that could create a conflict of interest

OVESCO Limited
Notes to the Accounts
for the year ended 31 December 2021

1 General information

OVESCO Limited is a private company limited by shares and incorporated in England and Wales.

Its registered number is: IP030875

Its registered office is:

2 Station Street

Lewes

East Sussex

BN7 2DL

The functional and presentational currency of the company is Sterling. The accounts are rounded to the nearest pound.

The accounts have been prepared in accordance with FRS 102 Section 1A-The Financial Reporting Standard applicable in the UK and Republic of Ireland(March 2018)and the Co-operative and Community Benefit Societies Act 2014.

2 Accounting policies

Turnover

Turnover is measured at the fair value of the consideration received or receivable. Turnover is reduced for estimated customer returns, rebates and other similar allowances.

Revenue from the sale of goods is recognised when all the following conditions are satisfied:

- the Company has transferred to the buyer the significant risks and rewards of ownership of the goods;
- the Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the Company; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Specifically, revenue from the sale of goods is recognised when goods are delivered and legal title is passed.

Tangible fixed assets and depreciation

Tangible fixed assets held for the company's own use are stated at cost less accumulated depreciation and accumulated impairment losses.

At each balance sheet date, the company reviews the carrying amount of its tangible fixed assets to determine whether there is any indication that any items have suffered an impairment loss. If any such indication exists, the recoverable amount of an asset is estimated in order to determine the extent of the impairment loss.

Depreciation is provided at the following annual rates in order to write off the cost or valuation less the estimated residual value of each asset over its estimated useful life:

Plant and machinery	5-10% Straight line
---------------------	---------------------

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in the profit and loss account because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax is recognised on timing differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible timing differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Current or deferred tax for the year is recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax is also recognised in other comprehensive income or directly in equity respectively.

Trade and other debtors

Trade and other debtors are initially recognised at fair value and thereafter stated at amortised cost using the effective interest method, less impairment losses for bad and doubtful debts.

Trade and other creditors

Short term creditors are measured at the transaction price. Other financial liabilities, including bank loans, are measured initially at fair value, net of transaction costs, and are measured subsequently at amortised cost using the effective interest method.

3 Judgements in applying accounting policies and key sources of estimation uncertainty

In preparing these financial statements, the directors have had to make the following judgements:

Tangible Fixed assets (see note 5)

Tangible fixed assets are depreciated over their useful lives taking into account residual values, where appropriate. the actual lives of the assets and residual values are assessed annually and may vary depending on a number of factors. In re-assessing asset lives, factors such as technological innovation, product life cycles and maintenance programmes are taken into account. Residual value assessments consider issues such as future market conditions, the remaining life of the asset and projected disposal values.
